**Intersexed** – also called hermaphroditism, is a general term used for a variety of conditions in which a person is born with a reproductive or sexual anatomy that does not fit the typical definitions of female or male. An intersexed person will have both XX and XY chromosomes.

1:1,666 children are born intersexed.

<http://www.isna.org/>

**Androgen Insensitivity Syndrome (AIS)** - is a condition that affects sexual development before birth and during puberty. People with this condition are genetically male, with XY chromosomes, however, as a fetus their bodies are unable to respond to the androgen hormone and as a result they have mostly female characteristics.

1:1,300 children are born with AIS.

\* **Actor Jamie Lee Curtis has AIS -**

**Klinefelter's Syndrome** – this condition typically affects males and involves the body having three chromosomes (XXY). Although anatomically male, at puberty the body matures with female characteristics due to release of estrogen. Young males with this condition develop breasts, do not grow facial hair, gain weight and may become lethargic.

1:1,000 children are born with Klinefelter's Syndrome.

**Gender Dysphoria** - Gender dysphoria describes the intense and continuous discomfort a person feels when their physical sex and gender identity are not aligned. Not all people experiencing gender dysphoria seek treatment. Long before they consider

medical treatment, in fact often long before they even realize what is happening within them, most gender dysphoric people will show signs of thinking and behaving in ways more usual to the sex opposite to that of their physical appearance. Because of social pressures, many gender dysphoric people enter a period of denial in their late teens, in which they try to suppress any thoughts or feelings to do with their gender identity. Gender dysphoric people suffer distress and impairment from societal intolerance, discrimination, violence, shame, and denial of personal freedoms that ordinary men and women take for granted.

1:500 children are born with gender dysphoria.
